

THANKWORD 谢鸣

Human beings as well as life are one of the comprising elements of space, therefore, when the space is just finished, it is clean and transparent. However, with the classic stacking of time and space, it becomes a tasteful home without being boring after a long time. There is neither deliberate emphasis on the design nor deliberate displaying of the material elements, instead, the designer tries to make the space exist as natural as possible. Every time, the birth of a perfect space will reflect that the designer embeds the homeowner's personalities and hobbies into every corner of the space, which is just the usual concept that design teams hold. It is not about the insistence of design but about naturally putting the life beauties into space, as if a feast of music and admirable food. In this case, the house type is good, which is square with high

SWA Group

SWA For over five decades, SWA has been recognized as one of the world's design leaders in the fields of landscape architecture, planning and urban design. They have received over 800 awards and have worked in more than 60 countries. Their principals are among the industry's most talented and experienced designers and planners. Emerging in 1959 as the West Coast office of Sasaki, Walker and Associates, the firm first assumed the SWA Group name in 1975. In 2005 SWA received the ASLA Firm Award, the highest honor the American Society of Landscape Architects can bestow on a landscape architecture firm. Despite being one of the largest firms of its type, SWA is organized into smaller studio-based offices that enhance creativity and client responsiveness with locations in California, Texas, and Shanghai. In addition to bringing strong aesthetic, functional, and social design ideas to their projects, they're also committed to integrating principles of environmental sustainability. At the core of their work is a passion for imaginative, solution-oriented design that adds value to land, buildings, cities, regions, and to people's lives.

BIG - Bjarke Ingels Group

BIG BIG - Bjarke Ingels Group is a Copenhagen and New York based group of architects, designers and thinkers operating within the fields of architecture, urbanism, research and development. BIG is led by eight partners - Bjarke Ingels, Andreas Klok Pedersen, Finn Nørkjær, David Zahle, Jakob Lange, Thomas Christoffersen and Managing Partners, Sheela Maini Søgaard and Kai-Uwe Bergmann. With an international team of more than 200 people, BIG works on projects across a broad spectrum of industries and in more than 20 countries worldwide. We take a human-centered approach to our work-looking at how our urban environments can increase the quality of life in finding ways of designing cities and buildings as double ecosystems that are both ecologically and economically profitable. In our work process we put great focus on the necessary details in order to realize the BIG idea.

A-cero Joaquín Torres & Rafael LLamazares Architects

A-cero Joaquín Torres & Rafael LLamazares Architects is an architecture firm founded in 1996, vowed to the integral development of architectural, interior design and urban planning projects.

The studio has a team of more than 100 specialized professionals, led by architect Joaquín Torres Vérez, working in two main headquarters in Spain, located in Madrid and A Coruña, and a foreign projects office in Dubai.

The practice has evolved in parallel to its clients' demands, building a large portfolio that comprises residential estates, resorts, office buildings, mixed-use high-rises, corporate and interior design. They have the capacity to carry out an architecture project in all its stages, since its conception until the construction management.

Halvorson Design Partnership, Inc.

HALVORSON DESIGN PARTNERSHIP Halvorson Design Partnership, Inc. is a Boston-based firm providing

professional landscape architectural, site planning and urban design services to a broad range of clients. Since its founding in 1980 the firm has helped institutions, municipalities, public agencies, and private organizations realize their goals for exemplary landscapes and urban open spaces. With a national reputation for excellence among both clients and professional colleagues, Halvorson Design Partnership is proud of our reputation for responsive, imaginative and sustainable work, executed with a contemporary outlook.

The architecture of landscapes is both process and product. Our process is founded on asking questions, listening, collaborating and envisioning a host of possible solutions. This dependable, partnering approach enables Halvorson Design to deliver lucid, implementable plans and beautiful built-landscapes that resonate, inspire and delight.

Tierra Design

Tierra Design is a multidisciplinary design firm established in 1995 in Singapore by Franklin Po. As designers with a focused desire to explore the relationship of the arts, culture, nature and land, we provide professional design services in architecture, landscape architecture, interior design, master planning, urban design and sustainable environmental design, in order to enhance the quality of life for people who occupy the spaces that we create.

Tierra projects are known for its economy of planting and sensual natural simplicity, beauty and quiet reserve. We have been the recipient of a number of awards for design excellence. Our projects include prestigious residential, commercial, hospitality and institutional projects in Singapore, Malaysia, Indonesia, India, China and Abu Dhabi.

We embrace diversity in our people, with collaboration playing a vital role in creating our unique, thoughtful and holistic designs. Our aim is to help clients make intelligent and well-informed decisions to enhance value for them and create a better future for our planet.

PLANT Architect Inc.

PLANT Architect Inc. is an award-winning practice that branches into the domains of architecture, landscape, and design.

The studio operates across spatial scales and disciplinary borders to reveal a site's potential, distill client-needs into a clear design vision, and create timeless spaces that heighten one's experience of a site, city, building, or natural landscape.

Their multidisciplinary team specializes in institutional, commercial, and residential architecture and landscape architecture, interiors, urban infrastructure, feasibility studies, and master planning. They also offer a range of value-added services that include furniture and lighting design, public facilitation, and integrated graphics. PLANT's interdisciplinary design approach allows their team to build important connections between people, places, and ideas, and it remains central to the firm's ongoing commitment to public engagement.

Newman Garrison + Partners

Newman Garrison + Partners (NG+P) is an innovative award-winning, full-service architecture and interior design studio based in Southern California. Celebrating 30 years as renowned architects and designers, NG+P provides clients a distinctive "one-stop shop" for planning, design,

inspiration and collaboration. As part of NG+P's creative portfolio, the firm was in the forefront of creating what is known today as the "Texas Wrap" high density solution and the most recently acclaimed and innovative "New Block" (Park Landing) urban in-fill prototype. NG+P's team of highly trained design professionals specialize in creating innovative, yet timeless, architectural design for mid- and high-rise multifamily towers; mixed-use, urban infill and transit-oriented developments; hospitality; resort communities; single family; and work-force and student housing. NG+P has received numerous awards for its outstanding design and land planning expertise, and collaborates with clients to plan and design creative, sustainable and cost-effective design solutions.

Dominique Perrault

Leading figure in French architecture, Dominique Perrault gained international recognition after winning the competition for the National French library in 1989 at the age of 36. This project marked the starting point of many other public and private commissions abroad, such as The Velodrome and Olympic swimming pool of Berlin, the extension of the European Court of Justice in Luxembourg, the Olympic tennis centre in Madrid, the campus of Ewha's University in Seoul, and the Fukoku Tower in Osaka, Japan. In 2014, he delivers the DC Tower in Vienna, the tallest tower in Austria, an icon of the new business district, as well as the Grand Theatre in Albi, France.

INDEX 索引

studio505

505

studio505 is an architecture and design studio based in Melbourne, Australia - working locally and around

the world.

The studio505 team and their network of makers, thinkers and consultants bring together a vast and intriguing selection of possibilities. The studio is committed to delivering exemplary innovation, elegant integration and sophisticated responses within the complex maelstrom of the design world.

Directors, Dylan Brady and Dirk Zimmermann lead the studio with the energetic synergy of their combined architectural partnership. A partnership they have developed and maintained since studio505's inception in 2003. This partnership results in an engaged passion that fuses artistic spirit with technical knowledge while actualizing a rich and enthusiastic source of innovation and expertise for the studio's clients and projects.

UNStudio

UNStudio, founded in 1988 by Ben van Berkel and Caroline Bos, is a Dutch architectural design studio specializing in architecture, urban development and infrastructural projects. The name, UNStudio, stands for United Network Studio referring to the collaborative nature of the practice.

Throughout more than 20 years of international project experience, UNStudio has continually expanded its capabilities through prolonged collaboration with an extended network of international consultants, partners, and advisors across the globe. This network, combined with the centrally located offices in Amsterdam, Shanghai and Hong Kong enables UNStudio to work efficiently anywhere in the world.

Pivotal UNStudio projects include; the Mercedes-Benz Museum in Stuttgart (Germany 2006), the large scale mixed-use project Raffles City in Hangzhou (China 2008 - 2013), the Galleria Department Store in Seoul (2005), the private family house VILLA NM in Upstate New York (USA 2007), the Agora Theatre in Lelystad (NL 2007) and the Erasmus Bridge in Rotterdam (NL 1996).

Chartier-Dalix architects

The reflection that they lead rests on the confrontation between different ideas that they look to compare, and to merge them within an open and unprejudiced discussion. Each project balances the delicate chemistry between program / cost / planning and style / integration / history.

These parameters are considered as tools that feed conception, and define the uniqueness and the strength of the building which results. The act of architecture is formed from a communal and multidisciplinary work, a contextual montage that is unifying and innovative.

The office currently has between 15 and 20 staff. Each project is supported from start to finish by a single team, producing the event itself, developing studies and dealing with the site. This organization allows them to monitor each project over time. This coincides with their commitment to build a motivated and stable team. Thanks to this operating principle, they are now building a cohesive team, formed with a collective spirit of architectural demands.

TROP

TROP is a landscape architectural design studio with a team of designers and construction supervisors.

Led by Pok Kobkongsanti, our philosophy is to create unique designs for each project that we work on. We believe that our design process is as important as the design itself, so we work very closely with each of our clients. Since 2007, TROP has been working on various projects throughout Asia. Currently, our works include Hospitality, Residential, Commercial and Installation

design. We won an Honor Award in Residential Design from American Society of Landscape Architects, ASLA 2012, for our Quattro by Sansiri project. Our Garden of Hilton Pattaya is also short-listed for Hotel of the Year 2012 by World. Architecture News and also won Thailand Property Award for Best Landscape Design. Seascape, our first project in Singapore won Singapore Property Award, Residential Design Category as well. Pok Kobkongsanti graduated from Harvard University, Graduate School of Design, in 2000. Since then, he had practiced with Mr. George Hargreaves Associates and Mr. Bill Bensley of Bensley Design Studio.

The Housing & Development Board (HDB)

The Housing & Development Board (HDB) is the public housing authority in Singapore. Born in a crisis to address an acute housing shortage situation, HDB has today successfully housed more than 80 percent of Singapore's resident population in well-designed apartments located in comprehensively planned housing estates. Beyond the hardware of public housing, the fostering of bonds between communities is also of utmost importance to HDB. HDB has earned much international acclaim, including winning the 2010 United Nations Habitat Scroll of Honour Award, to date the most prestigious human settlements award in the world.

Studio Landscape Architecture

Studio Landscape Architecture is interdisciplinary landscape architecture, urban design, and planning firms. Their experience is extensive and over eighty-five professional awards have recognized the quality of our services.

Their current arrangement of offices in Israel and the United States provides the clients with a wealth of experience and resources that combine the best of both the worlds. The principals take pride in being directly involved in all issues of design, whereas all other aspects of project management are suitably decentralized to each local office. The Studio office provides for day to day hands on contact and coordination, essential to the successful implementation of the design and the MPF&P initiates the design and follow it through to the realization of the project.

Tectoniques Architects

Founded 20 years ago, Tectoniques is a collective firm that brings together two generations of architects and engineers. It takes a militant approach in which architecture is closely linked to environmental strategies. With its considerable depth of experience in the field, it possesses recognised expertise and a solid critical framework.

Tectoniques has a team of some twenty designers. And the arrival of new young associates in 2007, then in 2011, has brought about a renewal, with an ongoing synergy between experience and dynamism.

The architectural firm is progressively developing new skills. In 2011, it obtained certification in quantity surveying and site management. And early this year, it began carrying out climatic and environmental engineering studies. Its aim is to attain both greater autonomy and tighter control over quality issues.

Martin Ferrero Architecture

Daniel Martín, became as an Architect in Madrid (Spain) and founded Martin Ferrero Architecture in 2008.

They specialize in the design of contemporary homes and they are committed to excellence in modern design. Their projects reflect an interest in modern living and a desire to connect our clients to the beauty of the surrounding natural environment.

They built with Nature, their main material, as the same way they do with Glass, concrete or Steel.

They are committed to environmentally sustainable design practices and have extensive experience in Building Integration of Photovoltaics Systems.

In fact their new solutions for Sculptural Solar Skins improve the design of our houses as well as the efficiency of their projects.

For them, Architecture is a just poem to the space.

Their clients let them the opportunity to write another verse.

T. R. Hamzah & Yeang Sdn Bhd

T. R. Hamzah & Yeang Sdn. Bhd. designs and delivers super

green signature buildings and masterplans that go beyond accreditation systems such as LEED, BREEAM, etc.

They create places, spaces, built forms and masterplans that endeavour to make their users and the public happy, pleasurable and be uplifting to their lives, which are signature (having an identifiable aesthetic), deep green (hyper sustainable and carbon-neutral), and that constantly pursues innovation (advances the state-of-the-art). Their business process is systemically customer-friendly with strict value-engineered cost control, focusing on eco and bioclimatic construction detailing.

The work is relevant, internationally recognized, credible (receiving since 1975 over 70 awards) and motivating (meaningful, enlivening and memorable). The firm has been in existence since 1976 and carries out work internationally from its HQ in Kuala Lumpur, Malaysia.

Ciel Rouge Creation

Ciel Rouge Creation is a French-Japanese established architectural office based in Tokyo and Paris. Between the East and West, ideas are exchanging from one side to another. These complementary cultures are enriching themselves in design and architectural concepts. French architect, Henri Gueydan, the founder of Ciel Rouge Creation is involved in

adapting architecture to its most precise function. The space should be the largest space possible, even on a very small scale. The idea is to create the ideal "weight of life" by smooth shapes, well positioned perspectives, measured lightness, adapted materials and colors. The space could be discrete, elastic, convenient and powerful at the same time. Through this philosophy, the construction has to be simple, appropriate, and well adapted to improve the "taste of existence". Since 1991, CRC has built a Protestant church in the heart of Tokyo, ecological housing in Paris and Nagoya. It has also designed thalassotherapy centers and hotels, museums, office buildings, private houses, factories, research centers and urban design. The scope of CRC's work is very diverse: through different domains, architecture is improving.

Sanitas Studio

Sanitas Studio is a Landscape and Art studio led by Sanitas

Pradittasnee with a team of architects and landscape architects. Sanitas studio works in the area between landscape architecture and Fine Art, inspired by social context, deep cultural research and seamless boundary between landscape architecture and Fine Art.

Sanitas Studio' works include sculptural work, art installation and landscape architecture projects. Each work deals with people's interaction and how it would provoke people's consciousness. By working in varying scale, each work is being explored in the possibility of built environment, its meaning and its interaction with people.

Starr Whitehouse Landscape Architects and Planners

Starr Whitehouse was formed by Laura Starr and Stephen Whitehouse to focus their professional commitment on making places more livable, green, and vibrant. Our approach brings energy and creativity to the

challenge of finding what is genuine and sustainable, a challenge that starts with recognizing the strata of natural systems, physical organization, social systems, regulations, history, and culture that come together in a location. With this base, recommendations and designs emerge through consensus-building and inspiration.

Starr Whitehouse values collaboration with clients, the public, allied disciplines, and specialists. As leaders and members of teams, Starr Whitehouse believes that communication and collaboration yield the richest results and the most effective partnerships. With comprehensive experience in parks, green spaces, urban design, and environmental planning in New York City and beyond, Starr Whitehouse spans a continuum of planning, strategy, and design through to implementation and management to meet the specific needs of our clients and community.

DS

DS has been active for 20 years as a leading design office at the intersection of architecture and landscape architecture both in theoretical and practical areas. Main goal has been to create applicable, sustainable designed environments.

Basic motivation in our designs is to build a specific microcosmos. The design group who makes up a principle of combining artistic qualities with economical and ethical values, considers the multidisciplinary contemporary medium as a source and from this complexity creates neat, original and creative environments.

Considering nature as another source, our design group filters nature and produces parametric desings directed by a syntactic perception of nature.

DS operates at an interval from human scale to urban scale with competent landscape designers, architects, urban planners, engineers and ecologists.

DS is an international member of ASLA (American Society of Landscape Architects).

Sharp & Diamond

Sharp & Diamond is a recognized leader in the design and transformation of healthy, vibrant communities.

We believe good design is sustainable, rooted in place, and embraces built form, infrastructure, and landscape. Our midsized office is a member of LEED® and the US and Canada Green Building Councils, with registration in BC, Washington, and California. The firm's strengths and values show in our personal service and diversity of work – civic, commercial, institutional, regenerative, and residential.

MyLandscapes Garden Designers

Mylandscapes is the brainchild of London based garden designer Amir Schlezinger. Originally a touring musician he studied garden design at Middlesex University and Capel Manor College and graduated in the year 2000. In October 2000 he coined the phrase mylandscapes, which was registered as a website in the UK. MyLandscapes had evolved a strong contemporary style in garden design with a particular expertise in roof gardens and roof terraces.

To date, mylandscapes had designed and built over 250 projects. These projects are primarily located in Central London with some projects in Italy, Dorset and Essex. Amir Schlezinger, the company director has contributed to numerous magazines and books on garden design worldwide. Having grown in the Mediterranean region his knowledge and understanding of both European and Tropical flora has contributed to a style of planting which combines sculptural and architectural plants with northern European traditions.

Pashek Associates

Our goal is to design sustainable places for people. Founded in 1986, Pashek Associates is an award winning

consulting firm of registered Landscape Architects, Recreation Practitioners, and Community Planners who are committed to improving our environment and who take pride in listening and being responsive to our clients' needs.

We create places that respond to the history, tradition, culture, and natural environment of the communities within which we work. We understand that each project is unique, and therefore, customize a design approach tailored to the specific needs of our clients. We ensure an engaging process that will produce positive results.

PROAP

PROAP is a leading international design practice exclusively dedicated to landscape architecture, founded in 1989, based in Lisbon

(Portugal) and with offices in Luanda (Angola) and Treviso (Italy).

The partnership is led by João Nunes and currently employs 30 professionals, a cross-disciplinary team, with distinguished levels of expertise in landscape, in its most inclusive conception. The firm's core business is landscape architecture, namely landscape design development, project management, sustainable design and development, urban design and planning.

XTU

Created in 2000 by Nicola Desmaziere and Anouk Legendre, XTU consists of 25 people gathering skills in architecture, design, research and urban

farming.

Part of an experiment dominated by public facilities, mainly academics and research, it has diversified in recent years in achieving housing projects and environmental projects and cultural museums in France and abroad.

Architectural posture is initially focused on the expression of architectural shape carved echoing the urban context and landscape. The context is the founder, it generates the form, write in a minimalist and refined, inspired by abstract sculptors, futuristic willingly.

Blondie's Treehouse Inc.

BLONDIE'S TREEHOUSE INC

Howard K. Freilich, a young, energetic entrepreneur and horticulturalist. Known for innovative designs and careful attention to the smallest details, Blondie's has received dozens of national awards for design and service. Specializing in creative landscapes for challenging urban spaces, Blondie's has created hundreds of public and private gardens on rooftops and in courtyards, terraces, tops and backyards. Teams of designers, project managers and crew members work hand in hand with clients from concept through completion. Every day, dozens of technicians fan out across the city to maintain these gardens and keep them picture perfect year round. With 3 locations, over 100 employees and over 35 years of experience, Blondie's has had such an impact on the gardens of New York City that you've likely seen our work without even knowing it.

ArquitectonicaGEO

ARQUITECTONICAGEO

Arquitectonica G E O was founded in 2005 by co-founder of Arquitectonica, Laurinda Spear, FAIA, RLA, LEED AP, ASLA, IIDA, to explore the complex challenges of contemporary built and natural environments, and to develop design solutions that balance a modern aesthetic with an environmental practice that creates value, identity, and a sustainable landscape.

The GEO landscaping philosophy is based on the principle of preserving a location's geographic character – the entire combination of natural and human attributes that make one place distinct from another – an authentic design process that preserves the ecological and cultural environment.

The GEO team is led by Ms. Laurinda Spear, Principal, Ms. Margarita Blanco, Director and Mr. George Fogg, Vice President. The designs are developed and produced in the firm's head office in Miami. The design team is supported by a team of specialist landscape architects, urban planners, horticulturists and designers specifically structured for each project.

Xavier de Chirac

Bathed in the nature of a young age, Xavier de Chirac sends his passionate love of flora.

respect, humility, listening and simplicity are its watchwords.

After an encounter with a botanist, he began his studies at an agricultural college and a school of landscape architecture in Belgium.

Landscape architect and Gardner in spirit, Xavier de Chirac has been creating terraces, patios, and gardens for 15 years.

He has worked in both urban and pastoral contexts. He is attached to conserving the essence of a place and gives it a specific character corresponding to the landowner's personality and desires. His conceptions integrate perfectly to their environment creating a unity. The colours, materials, shapes and volumes of each composition combined establish harmonious sceneries. Moreover, the multiple vistas created play with the different perspectives. The floral punctuations bring a final touch or give way to graphic plants in more contemporary projects. Each project finds its identity in relation to the use of the exterior spaces.

Shma Company Limited

Shma Company Limited was found in 2007 by Namchai Saensupha, Prapan Napawongdee, and Yossapon Boonsom as a place for people who share same interest in improving landscape environment through design. Our aspiration is to create a space that is delightful and inspiring.

We seek simplicity in design that responds to complexity of climate, culture, history, topography, and environment of each site. We believe that design emerged from these contexts of a site, reflect upon a unique characteristic of each project. Clarity of our space is intensified through sensitive selection of materials and planting palette composed with refined detailing which develops to reinforce the concept of each particular project.

ACME

ACME is based in London, Sydney, San Francisco and Berlin, operating in the fields of contemporary architecture, urban planning, interior design and

product design. Since its founding in 2007, ACME has worked on 124 projects in 19 different countries – with private, corporate and public clients. The practice's 56 architects are of 19 nationalities.

ACME wins much of its work through national and international design competitions and has gained recognition for its contemporary design based on a deep interest in each individual place and location; for innovation in pushing the boundaries of complex façade designs; for its integrated approach to structure and sustainability and its ability to work within commercial boundaries of budget and programme.

NL Architects

NL Architects is an Amsterdam based office. The three principals, Pieter Bannenberg, Walter van Dijk and Kamiel Klaasse, officially opened practice in January 1997, but had shared workspace already since the early nineties. All were

educated at the Technical University in Delft. NL Architects aspires to catalyze urban life. The office is on a constant hunt to find alternatives for the way we live and work.

Often the projects focus on ordinary aspects of everyday life, including the unappreciated or negative, that are enhanced or twisted in order to bring to the fore the unexpected potential of the things that surround us. By sampling existing fragments of reality and recombining them, gluing bits and pieces together into new coherent arrangements, our architecture can be understood as The Remix of Reality: the architect as DeeJay.

ECDM architectes

Founded after being the recipient of the Albums de la Jeune Architecture award in 1993 and the Villa Médicis Hors les Murs – scholarship in 1996, Emmanuel Combarel and Dominique Marrec Architects (ECDM)

is leading a work focused working on defining a living environment through an architectural project. The architecture that materializes the firm's approach is underpinned by the evolutions and mutations of our society. The dynamics of the project emerges from a confrontation with the context, and a hierarchization of the problematics induced by the program and the site. Environmental quality, landscape, uses, ways of life, and technical choices are all structuring elements of the office's projects. The architecture that materializes the firm's approach is underpinned by the evolutions and mutations of our society. It tends to be a simple, sober architecture following a rigorous logic, with no preconceptions, nostalgia or stylistic preoccupations.

Town & Gardens, Ltd.

Town & Gardens, Ltd. is a comprehensive landscape design/build company that has been serving the New York metropolitan area since 1995. Over the past 20 years they have built a diverse team of landscape architects, designers, horticulturists,

arborists and irrigation/lighting specialists to help transform empty spaces into beautiful city escapes.

From the earliest stage in the process, their award winning team guarantees the highest level of quality and commitment. From design through the maintenance of a garden or green wall, they work closely with their clients to ensure that their needs are being met every step of the way. This gives each client the peace of mind that the project will run smoothly and meet their high expectations.
